

**INTERMOUNTAIN HEALTHCARE AND SOTERA WIRELESS TO
SHOWCASE VISI MOBILE AT HIMSS 2013**

Live presentations and demonstrations will be held March 4-6, 2013 in Booth# 1810

Salt Lake City, UT and San Diego, CA, February 27, 2013 — [Intermountain Healthcare](#) and [Sotera Wireless, Inc.](#) announced today that Sotera's new wireless patient monitoring platform, [ViSi Mobile](#)[®], will be featured in Intermountain Healthcare's booth #1810 at [HIMSS 2013](#).

Inter mountain Healthcare is a leader in providing high-quality patient care and improving patient safety by deploying innovative technologies smartly. In line with this initiative, Intermountain Healthcare is currently piloting ViSi Mobile in two post-surgical care units at its flagship hospital, [Intermountain Medical Center](#) located in Murray, Utah, as well as [LDS Hospital](#), located in Salt Lake City, Utah.

The FDA-approved ViSi Mobile System continuously monitors all core vital signs—heart rate or pulse rate, electrocardiogram (ECG), blood pressure, blood oxygenation level, respiration rate and skin temperature—all with a monitoring accuracy typically found in intensive care units while not restricting the patient's mobility. ViSi Mobile is able to wirelessly transmit patient vital sign information for remote viewing and notification, as well as to interface with Electronic Medical Records (EMR).

WHEN: Monday, March 4 through Wednesday, March 6, 2013
Presentations: Monday, 3pm / Tuesday, 4pm / Wednesday, 3pm
Live Demos: Upon request Monday through Wednesday

WHERE: Booth# 1810 (Intermountain Healthcare booth at HIMSS 2013)
Ernest N. Morial Convention Center
900 Convention Center Blvd.
New Orleans, LA 70130

“Our mission to transform healthcare continues to focus on improving quality and lowering costs,” said Frederick Holston, chief technology officer at Intermountain. “The use of technologies like ViSi Mobile will allow our clinicians to provide the highest quality care. Being able to monitor all vital signs non-invasively and continuously creates a better healing experience for our patients and allows caregivers to detect early warning signs.”

“We are very excited that Intermountain Healthcare has chosen to feature ViSi Mobile in its booth at HIMSS,” said [Dr. Gunnar Trommer](#), VP Marketing at Sotera Wireless. “Intermountain is recognized as one of the leaders in healthcare and is clearly aligned

with our vision to improve patient safety—that’s why we have partnered together to deliver better patient care and patient safety.”

About Intermountain Healthcare

Intermountain Healthcare is an internationally recognized, nonprofit, system of 22 hospitals, a Medical Group with more than 185 physician clinics, and an affiliated health insurance company, SelectHealth. 33,000 employees serve patients and plan members in Utah and southeastern Idaho. Intermountain Healthcare offers a full range of services, from urgent care to home care to the region's most advanced trauma centers. Providing excellent care of the highest quality at an affordable cost is at the heart of Intermountain’s mission.
